African Solutions for Better Health

SHORT CERTIFICATE COURSES

“It is now increasingly recognized that the health care system in Uganda as it stands today does not address adequately the multitudes of health problems and concerns for all Ugandans. 60% of the Ugandan population is using traditional medicine for primary health care (MoH 2012). However, there has not been any formal teaching or training in this field to generate professionals. THETA Uganda is offering the following unique and skills oriented short courses in herbal medicines practice for the public”
